# CALL FOR PAPERS

As the human population continues to grow, finding means to feed people is one of the most important challenges faced around the globe. The role and importance of aquaculture in ensuring a consistent supply of aquatic species for human consumption cannot be overstated.

The aquaculture is challenged with the responsibility of feeding a rapidly growing global population. Thus, aquaculture production has to increase to keep up with demand. Besides, achievement sustainability in aquaculture is an important issue facing current and future generations.

Hereby, we invite you and your colleagues to submit articles to publish in the Special issue of the journal Sustainable Food Production. This special issue will focus on the quality, competitiveness and sustainability in Aquaculture.

We encourage the submission of original research and review articles focusing on feasible solutions of challenges facing aquaculture. Our objective is to strengthen the competitiveness of aquaculture producers and improve the productivity of crops, to contribute to economic growth, food security and social welfare.

The submitted manuscripts should be addressed to the **following Potential Topics**:

- optimization of the production systems;
- development of alternative feed for animal nutrition, and reduction of the use of antimicrobials, to ensure the animal welfare;
- increasing the production without damaging or altering the environment;
- obtaining the products of high quality.

Guidelines for Authors and other details are available on the website of the journal.

Authors can submit their manuscripts through the SciPress Online Publishing System at https://www.scipress.com/

Following acceptance, a paper will normally be published in the special issue.

**Lead Guest Editor**:

Andrea Gomez-Zavaglia, (PhD in Exact Sciences), Center for Research and Development in Food Cryotechnology (CIDCA) CONICET, Argentina
